

# SKIN RESTORATION, REFINED.

MAPPED WITH INTENTION AND  
DESIGNED TO EVOLVE WITH YOU

CURNYX

BEGIN YOUR SKIN RESTORATION WITH INTENTION

# Redefining beauty through a holistic, data-driven, and human-centered model.

At Ouronyx, we restore radiance with precision,  
subtlety, and care.

Because your skin tells a story and we're here  
to help you write it, beautifully.

## Mindful by Design

At Ouronyx, skin health and facial harmony are approached with intention. We begin by understanding your skin at its source through advanced diagnostics and expert insight and build care plans that honour your biology, goals, and lifestyle.

Our treatments are not designed to change you. They are designed to support you, to preserve what you love, soften what no longer serves you, and create space for renewal.

Because when skin and structure are supported from within, beauty becomes effortless, and more importantly, it becomes your own.

## More Than Skin Deep

We've all been conditioned to treat skin from the outside in, chasing the latest facial, serum, or trend with the hope of brighter, smoother, younger-looking skin. But true skin health lives deeper than the surface. It begins with understanding your unique biology, and it thrives with consistency, precision, and care.

At Ouronyx, we combine advanced diagnostics, psychology-informed consultation, and regenerative medical aesthetics to address not just how your skin looks but how it functions, feels, and evolves over time.

Whether you're navigating texture, tone, collagen loss or facial ageing, we don't mask or minimise. We decode. We plan. We restore. And we walk with you through every step — subtly, sustainably, and with intention.

Because real skin health isn't about perfecting the face you see today. It's about supporting the one you'll carry for life.

# The process

## A PERSONALISED, PRECISION-LED JOURNEY

1

### Diagnostics & Scans

We start with high-resolution imaging to assess hydration, pigmentation, collagen, texture, bone mass, structure and inflammation beneath the surface.

2

### Expert Consultation

From there, our doctors guide you through your results and create a tailored plan to match your skin's current needs, future potential as well as your personal goals.

3

### Personalised Treatment Plan

Together, we build a plan tailored to your skin's needs and rhythm, from quick refreshers to full-face restoration.

4

### Tailored Treatments

We combine injectables, regenerative, and energy-based therapies to restore radiance, firmness, and facial balance.

5

### Ongoing Care & Review

Progress is tracked over time, with expert adjustments, seasonal updates, and advanced home care support.

# Our treatments

## SKIN QUALITY

REFRESH, RESURFACE, RECHARGE

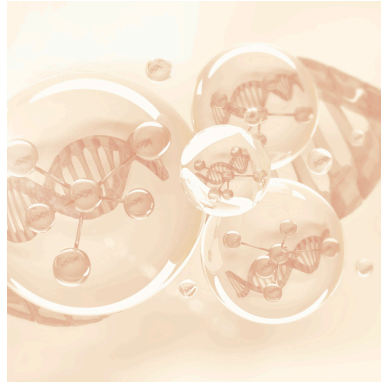

### HYDRATION INFUSION

This injectable treatment delivers deep hyaluronic acid hydration to replenish moisture, improve suppleness, and restore balance to stressed skin. Ideal for dryness, fatigue, and post-travel or seasonal reset.

**Benefits:** Rehydrates and plumps skin, smooths fine lines, restores luminosity, and supports long-term skin barrier health.

**Protocol:** 1–2 sessions, spaced 4 weeks apart. Each session lasts ~30 minutes.

**Downtime:** None to minimal. Mild redness possible post-treatment.

### SKIN HEALTH POLYNUCLEOTIDES

Using DNA fragments to calm inflammation and signal repair, this injectable regenerates skin at a cellular level. It strengthens resilience and enhances collagen and elastin production from within.

**Benefits:** Calms stressed skin, improves sensitivity, strengthens structure, and supports tissue regeneration.

**Protocol:** 3 sessions, spaced 2–4 weeks apart. Maintenance as advised.

**Downtime:** Mild redness or swelling at injection points, but no significant downtime.

### DERMA MATRIX ACTIVATION

Amino-acid and hyaluronic-acid injectables reactivate the skin's extracellular matrix, restoring balance to collagen and elastin. A subtle and effective way to refine texture and tone.

**Benefits:** Improves skin density and elasticity, smooths fine texture, and refines skin quality without visible volume.

**Protocol:** 2–3 sessions, spaced monthly. Maintenance every 6–12 months.

**Downtime:** Minimal. Slight swelling or tenderness may occur short-term.

# Our treatments

## SKIN QUALITY REFRESH, RESURFACE, RECHARGE

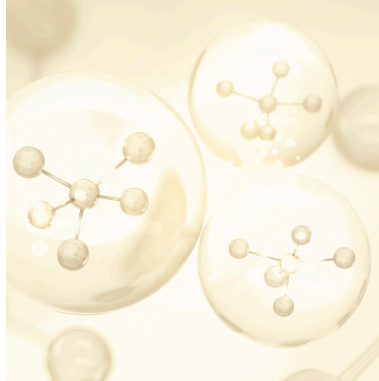

### NEOGEN PLASMA RENEWAL

Advanced nitrogen-plasma energy remodels the skin architecture at various depths. It targets laxity, pigmentation, texture and pore refinement, offering a powerful reset with controlled downtime.

**Benefits:** Refines skin tone and texture, lifts, firms, and smooths. Reduces sun damage, acne scarring, and fine lines.

**Protocol:** 1–3 sessions depending on depth. Follow-up treatments can be customised seasonally.

**Downtime:** Varies by intensity — ranges from no downtime to ~7 days of visible skin shedding.

### CALCIUM MICROSPHERE LIFT

This injectable biostimulator uses calcium-based microspheres (CaHA), stimulating collagen over time without adding volume. It provides natural lift and firmness, ideal for areas beginning to lose structure.

**Benefits:** Firms and lifts sagging skin, improves elasticity, and defines contours without visible bulk.

**Protocol:** 1–2 sessions, spaced 6–12 months apart. Effects build over several months.

**Downtime:** Mild swelling or tenderness at injection points, typically resolving within 24–48 hours.

### BOTULINUM TOXIN LIFT

Muscle-relaxing injections that smooth both static and dynamic lines. By softening downward-pulling muscles, this treatment delivers a lifted, refreshed appearance while helping to slow visible signs of ageing.

**Benefits:** Softens expression lines, smooths forehead and eye area, prevents deep wrinkle formation, and subtly lifts key facial zones.

**Protocol:** Every 3–6 months, depending on individual patterns and aesthetic goals.

**Downtime:** None. Mild redness or swelling at injection points that fades within hours.

# Our treatments

## FACIAL STRUCTURE REJUVENATE, RESTORE, REPOSITION

### REFINEMENT

A subtle refresh using skin boosters and wrinkle-smoothing injectables. This entry-level treatment enhances hydration, softens expression lines, and restores a healthy glow — often described as “injectable skincare.”

**Benefits:** Smooths fine lines, brightens dull skin, and creates a rested, luminous appearance.

**Protocol:** 1–2 sessions depending on product type, spaced 3–4 weeks apart.

**Downtime:** Minimal. Possible light swelling or pinpoint redness.

*Starting from 3,500AED*

### ENHANCEMENT

Facial contouring with hyaluronic acid fillers to enhance natural structure. We focus on the cheeks, chin, jawline, and temples, as well as lips and eyes, for a sculpted, yet soft result.

**Benefits:** Defines, enhances and balances facial proportions and restores volume.

**Protocol:** Typically a single session, with results lasting 12–18 months.

**Downtime:** Mild swelling or bruising in treated areas may occur. Most clients resume normal activity within 24 hours.

*Starting from 11,500AED*

### RESTORATION

A comprehensive approach that combines structural filler, muscle relaxants, and energy-based skin tightening to restore facial volume and reposition soft tissue — ideal for addressing the deeper signs of ageing.

**Benefits:** Lifts and sculpts the face, restores youthful structure for long-lasting facial harmony.

**Protocol:** Often completed over 1–2 sessions, with follow-ups every 12–24 months.

**Downtime:** Variable. Some swelling or tenderness is expected; energy-based elements may cause light skin peeling or redness.

*Starting from 16,000AED*

# Real Results, Subtly Revealed

At Ouronyx, we don't aim for dramatic transformations. Our approach is measured in more than millimetres.

Our results are grounded in data and designed for life. From smoother skin to restored contours and reduced signs of stress or fatigue, every before and after tells a story of care, not correction.

Here's what subtle, intelligent restoration can look like when led by experts and guided by your own biology.

## SKIN/FACE RESTORATION BEFORE & AFTER RESULTS

Improve subtle signs of ageing

Address skin laxity and volume

Enhance facial balance

Lifted & rejuvenated

Tighter, lifted & rejuvenated

# THE OURONYX DIFFERENCE

We don't follow trends —  
we follow truth.

At Ouronyx, our mission is to lead with  
science, prioritise health, and reject the  
culture of fast, performative beauty.

Every protocol we offer is rooted in clinical  
precision and designed to empower —  
not overwhelm.

Our entire medical team are united by  
a single principle: that beauty should feel  
authentic, safe, and supported. And that your  
confidence should never be rushed.

# FAQS

## **What types of skin treatments do you offer?**

We offer range of personalised skin treatments designed to address hydration, texture, collagen stimulation, pigmentation, early ageing, and inflammation. We combine injectables, energy-based technologies, and regenerative therapies to restore skin health and radiance.

## **How soon will I see results?**

Some treatments offer immediate improvements, while others build gradually over time. Your doctor will guide you through the expected timeline based on your plan and desired outcome.

## **How long is recovery?**

Many of our treatments have little to no downtime. You may experience temporary redness, swelling, or sensitivity, depending on the procedure, but most clients resume normal activities the same day.

## **What can I expect during a consultation?**

Every journey begins with diagnostics. We assess your skin's condition using advanced imaging, then discuss your goals to design a treatment plan that is tailored to your biology, lifestyle, and preferences.

## **How long will the results last?**

It depends on the treatment — some results last several months, others build and improve over time with maintenance. During your consultation, we'll explain the longevity of your personalised plan.

## **Are these treatments suitable for men?**

Yes. Our approach is entirely personalised — we treat both men and women based on their individual skin concerns, structure, and goals.

## **Can I combine skin treatments?**

Absolutely. Many of our treatments work best when layered thoughtfully — for example, combining skin boosters with collagen-stimulating biostimulators or energy-based devices for more comprehensive results.

## **Is it painful?**

Most treatments are well-tolerated. We use numbing creams where needed, and our doctors prioritise your comfort throughout every step of the process.

## **Still have questions?**

We're here for you — whether you're exploring options or already on your journey. Reach out anytime to speak with our team or schedule a consultation.
